CPM1A

CPM1A Features

- Micro size
- New transistor outputs CPUs that can handle pulse outputs. This feature allows the CPM1A to control one axis of motion at a time
- Built in 5kHz high-speed counter supports increment mode or phase differential inputs at 2.5kHz
- 4 different CPU modules with I/O density options 10, 20, 30 and 40. The 30 and 40 I/O blocks are expandable up to 3 modules each
- Peripheral ports that are easily converted to RS232 ports for communications with operator interface terminals or PCs

CPM1

Meet global safety standards and save space at the same time. The CPM1 is a cost-effective, benefit-laden solution for small-scale control applications with several innovative features:

- Micro size
- Meets global safety standards: UL, CSA, CE (EMC and Low Voltage directives)
- I/O density options include 10, 20 and the new 30 CDR that is expandable up to 3 modules for a total of 90 I/O
- User set input delay for more reliable inputs

CPM1A-MAD01

Introducing the new CPM1A-MAD01 Mixed Analog Digital I/O module. Compatible with the CPM1A and the CPM1, this module is designed to facilitate the integration of analog signals into your small-scale control systems.

- 2 analog inputs/1 analog output with eight bit resolution
- Conversion time of 10 ms
- I/O signal range can be set individually for each input
- Constant monitoring for "broken wire" and for +/- voltage
