Power OFF Delay Timer

■ Proper usage

◎ Power

This product is power OFF delay timer, the time of min. power supply is 0.1sec. for AT8PSN type and 2sec. for AT8PMN. Therefore be sure that this product will operation after power off.

※Please use the power within rating power and apply.

◎ Noise

- 1) We test 2kV, Pulse width $1\mu\text{s}$ against impulse voltage between power terminals and 1kV, Pulse width $1\mu\text{s}$ at noise simulator against external noise voltage. Please install MP condensor ($0.1\sim 1\mu\text{F}$) or Oil condensor between power terminals when over Impulse noise voltage occurs.
- 2) When testing dielectric voltage and insulation resistance of the control panel with this unit installed.
 - Please isolate this unit from the circuit of control panel.
 - Please make all terminals of this unit short-circuited.
(It prevents the damage of inner circuit.)

◎ Environment

Please avoid the following places:

- A place where this product may be damaged by strong impact or vibration.
- A place where corrosive gas or flammable gas, water, oil and dust exist.
- A place where magnetic and electrical noise occur.
- A place where high temperature and humidity are beyond rated specification.
- A place where there are strong alkalis and acids.
- A place where there are direct rays of sun.
